

## Model 2KG

The Edward Segal, Inc. **Model 2KG** is a semi-automatic grommet machine specifically engineered for light to medium duty applications. This machine is built around a newly designed frame that requires less space and is much lighter than previous generations of machines. The 2KG automatically feeds grommet, punches the hole in the material and attaches the grommet and washer (hand placed), all in a single cycle. .

### Features

- **Advanced cutting technology to punch a hole in multi-layered materials**
- **Compensator to allow for a nominal variance in material thickness**
- **Includes Ring Guard safety to protect operator from pinch point areas**
- **Available for grommet & washer sizes No. 00 to No. 2**  
**(including Telescopic, Tooth and Spur)**
- **Can be upgraded by the Factory to a fully automatic machine (2KGW) with addition of Washer Raceway and Washer Shuttle mechanisms**

### Standard Equipment

- Heavy Duty Machine Stand
- Laser Target Light

### Optional Equipment

- Mobile Machine Stand with Casters (as pictured)
- Adjustable Spacing Gauge
- Dual Palm Buttons

(Shown with Optional Spacing Gauge?)
