

Portable Pneumatic Press

Model 3P5

The **Model 3P5** is a portable pneumatic press specifically designed for grommet applications. At only 22 pounds, 17" tall, 4" wide and 11" deep, this powerful compact press is capable of punching a hole in a wide range of industrial fabrics and setting a grommet and washer, all in a single cycle. The 3P5 is available for grommets up to No. 4, Plain and Rolled Rim, and can also accommodate Snap Fasteners. All of the setting tools in the 3P5 line are interchangeable, and are simply threaded in-place to facilitate fast conversions between grommet sizes. This machine is built on a sturdy welded frame and designed for safe operation, portability and ease of use.

The 3P5 is designed to be portable or bench mounted. Several alternative configurations allow the 3P5 to be used in the most productive manner including: (a) Pedestal Stand with optional foot pedal; (b) Mobile Base for floor work; and (c) Tool Rack with Storage Bins.

The 3P5 provides a number of benefits. It puts an end to the ergonomic challenges of using a hammer or manual press, and also reduces fastener costs for users of Self Piercing grommets. The 3P5 punches the hole, not the grommet, so the additional cost for self piercing grommets is eliminated.

When extra force is needed for oversized grommets or heavier materials, the 3P5-X should be considered.
